DOE Science, Technology and Policy Program– Office of Policy, Industrial Technologies Analysis Fellow

<https://www.zintellelect.com/Opportunity/Details/DOE-STP-OP-2024-0006>

About the Office of Policy

The Department of Energy's (DOE) Office of Policy (OP) is leading analysis and supporting the coordination of joint activities across the research, development, demonstration and deployment (RDD&D) spectrum to reduce emissions in the industrial sector and increase U.S. competitiveness. With 30% of primary energy-related emissions attributable to the industrial sector, the enhanced coordination that the Office of Policy will provide plays an important role in supporting the reduction of U.S. CO₂ emissions by 50% by 2030 (compared to 2005 levels) and achieving net-zero carbon emissions by 2050. Industrial subsectors of interest include petrochemicals, chemicals, metals, cement and concrete, pulp and paper, food and beverage. Technology areas of interest include carbon capture, process electrification, energy efficiency, and hydrogen.

The Office of Policy is seeking an Industrial Technologies Analysis Fellow to learn about the overall enhanced coordination of activities across multiple offices within the Department of Energy and with other agencies and external stakeholders. The Industrial Technologies Analysis Fellow will participate alongside the Industrial Technologies Senior Advisor in the Office of Policy under the guidance of the Chairs of the Industrial Technologies Joint Strategy Team from the Office of Manufacturing and Energy Supply Chains, Office of Industrial Efficiency and Decarbonization and the Office of Clean Energy Demonstrations.

What will I be doing?

OP is seeking a talented and passionate fellow interested in participating on strategic, analytic, and policy efforts aimed at decarbonizing the industrial sector. The fellow will collaborate closely with multiple staff across DOE—including several former fellows—and will develop a broad understanding of the potential of new technologies and current barriers to technology deployment.

You will have the opportunity to learn how to:

- Facilitate engagement and collaborate with other DOE programs and offices, participating in office-wide or interoffice initiatives, task forces, or tech teams (e.g. the Energy Earthshots and other Joint Strategy Teams).
- Assess modeling, analytical, and data development work across DOE and other agencies, identify enhancement opportunities and contribute to development of world class analytical capabilities.
- Participate in reviewing and providing input on technical reports, analysis, roadmaps, research proposals, and other technical documents.
- Participate in preparing and presenting briefings to upper management, external offices, and at conferences.
- Interface with technical, policy, and business leaders from academia, national labs, the private sector, and other government agencies (e.g. through interagency working groups).
- Participate in the planning and execution of workshops, webinars, and other stakeholder events or initiatives as needed.

Preferred qualifications include experience in:

- **Data analysis**
- **Technoeconomic modeling**
- **Energy and emissions modeling**
- **Economic modeling of manufacturing technologies:**
 - **Chemicals**
 - **Metals**
 - **Cement and Concrete**
 - **Pulp and Paper**
 - **Food and Beverage**
